

# BatchMaster ERP for Automotive Paints

## Brighten up your business prospects

The first thing about a car that catches your eye is not its power or performance, but its external appearance comprising of its design and color. While both are equally significant a factor which drive consumer demand, color holds a slightly more important place. In fact so fussy are some customers that they might for once compromise on the design, but not on color. Thus, it becomes supremely important for the automotive manufacturers to give special attention to vehicle's paintwork. This in turn keeps automotive paints manufacturers under constant pressure to deliver and maintain highest standards of quality, which is not an easy task given the present manufacturing scenario where over 1000 vehicles are manufactured in a given day.

In such testing times, BatchMaster ERP for Automotive Paints stands firmly with the automotive paints industry from last 30 years, helping them maximize production and reduce costs while simultaneously meeting quality standards. The fully-loaded software solution also takes care of the supply-chain complexities, automates critical business processes into a fully integrated operations, manages formulation, helps comply with government regulations, et al.

# BatchMaster ERP for Automotive Paints
