

# BATCHMASTER® mobile

BatchMaster Mobile represents the next generation of Warehouse Management Systems (WMS), extending the capabilities beyond simple shipping and receiving to the entire enterprise. Coupled with affordable wireless handheld hardware, BatchMaster Mobile™ is an easy route to more accurate real time inventory, streamlined production, increased employee productivity, and improved data access.

BatchMaster Mobile provides powerful warehouse management capabilities integrated directly with BatchMaster's purchasing, production, sales and inventory modules. BatchMaster Mobile is also the ideal solution for automatically printing product and shipping labels from any printer in your facility. In addition, users can print any number of compliance documents like Certificate of Analysis (CoA), Bill of Lading (BOL), Material Safety Data Sheets (MSDS), packing slips, pallet labels and more.

Eliminate hundreds, maybe thousands, of keystrokes daily with UCC/EAN bar-code scanning through hand-held devices by entering transactions right where they happen throughout the plant without ever needing to access a desktop computer. Updating is instant no batch nodes, no third-party interfaces, no reconciliation programs to run. Eliminate the paperwork to improve productivity and eliminate errors.

## Automated Inventory Activities

- Inventory Transactions
- Receiving
- Replenishment
- Putaway
- Sales and Production Picking
- Packing
- Shipping
- Label Printing
- Inquiry (Item / Bin / Lots)
- Production Issue
- Batch Close

# BATCHMASTER® mobile

Fundamental to the success of a warehouse operation is the knowledge of where and how much of a material or product is available in the warehouse at all times. Introducing BatchMaster Mobile will give you real-time updates of your warehouse, giving quick and accurate information about your storage locations. Result increased throughput and productivity.

## Features

- Tightly integrates with BatchMaster ERP
- Handles transactions related to inventory as well as sales and purchasing
- Transactions in warehouse updated to BatchMaster database in real-time
- Automated data collection using bar-codes and RF devices
- Supports palletization as well as other distribution activity
- Operates on any mobile device, including phones, iPads, etc.
