

Best ERP technology by BatchMaster Software

Strengthen the capability of handling business operations and make them more simplified

With the technological advancements emerging at high speed, it becomes important for businesses to accept the change and embrace new technological advancements to stay ahead in the competition.

Yes, it's quite true that you cannot govern the external challenges (varying raw material prices, frequently changing customer expectation, stringent getting laws, et al) impacting your business. But, definitely you can take control of your internal operations to help your business fight these external challenges and touch the zenith. And, one such way to empower internal control is through BatchMaster ERP.

BatchMaster offers a range of ERP products to make businesses simpler. Whether it be: process manufacturing, retail, e-commerce, Finance, or GST- BatchMaster has a solution for all. Perfect understanding of businesses and keen observation of latest trend is the foundation behind the development of range of products. And, what sets BatchMaster apart is described below. Let's have a look.

1. True-Process Centric Approach

BatchMaster ERP is a fully functional and true process centric ERP solution. Built with in-depth industry knowledge and upgraded constantly with the experience gained from serving process manufacturers for more than 30 years, the product completely supports supply chain operations and successfully meets industry standards. Besides incorporating the robust modules to handle product development, formula management, planning, procurement, inventory, production, quality, compliance, finance, GST and sales; BatchMaster ERP also includes out-of-the-box reports, numerous dashboards and inbuilt business intelligence that gives holistic-yet-detailed picture of the business aiding accurate, better and informed decision making.

- End-to-end process manufacturing ERP
- Supports complete supply chain operations
- Meets industry standards and compliance
- Tracks finance and eases profit/loss analysis
- Simplifies handling of GST

2. Extremely User Friendly Interface

Users take very less time in getting acquainted with BatchMaster ERP. It is designed with complete user-centric approach. It has a great GUI and user friendly interface with attractive look and feel that makes it possible to see and easily analyze critical business information in real time across all departments or offices in multiple locations, in the simplest of way.

- Filters to eliminate redundant data during analysis
- Different colours for mandatory data fields
- Flexibility to apply regional specific language
- Hyperlinks on field captions to drill down to its detail
- Attachment of SOPs/docs on various fields
- Allows adding fields and customize reports through simple process
- Online e-learning portal that provides training wherever and whenever you want
- Complete training documentation and white papers delivered with the product

3. Business Intelligence to Make Smart and Accurate Decisions

BatchMaster ERP has an integrated Business Intelligence feature that empowers you to analyze the business performance on-the-fly and generate reports using simple drag & drop of the real-time data. This helps you identify operational trends, weaknesses, and discover opportunities so that right actions can be taken on them at the right time. Moreover, it also incorporates the capability to promptly drill down to the deepest level of the intended data to observe and analyze the situations.

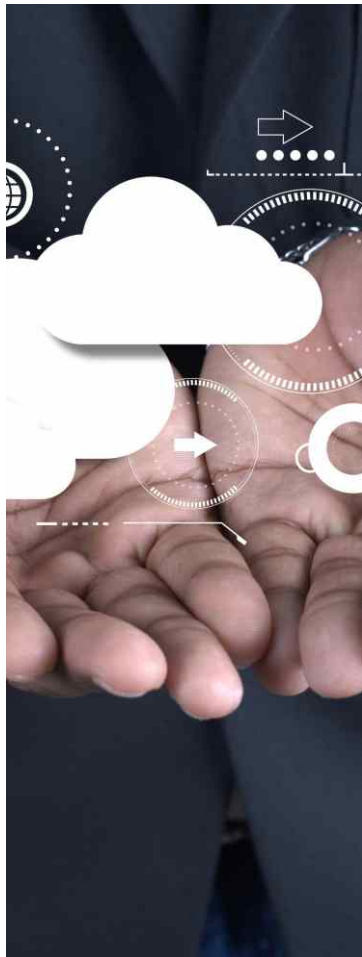

- Gathers entire data and presents it in easy-to-understand form
- Generates reports that can be viewed in the form of graphs and charts
- Analyses business data dynamically in few seconds
- Stores outputs as query, thus can be viewed or extended in the future
- Perform filtering and totalling to meet any comprehensive reporting on data
- Export data in excel format, without losing the consistency and accuracy

4. Warehouse Management System - Flexibility to Execute Operations Remotely

BatchMaster has developed the mobile softwares that helps manufacturers control and manage their day-to-day operations in a warehouse efficiently. It enables them to execute and track details of different warehouse operations like: receiving, shipment, all internal movements, LPN/Pallet management and shop floor transactions from a mobile/handheld device right at the place of occurrence. As a result, the manufacturers relish the benefits like: inventory accuracy, inventory visibility, space utilization, labor productivity, and cost saving.

- Improve inventory precision
- Increase warehouse productivity
- Process orders faster
- Improve picking & shipping accuracy
- Achieve more order accuracy
- Increases volume of outbound shipments; double your orders per day
- Improve employee productivity and keep personnel costs low
- Low TCO compared to alternatives
Quick ROI

5. Cloud Platform to Offer Anytime, Anywhere Access

BatchMaster also supports the Cloud platform. It offers the SAAS based version of BatchMaster ERP that helps small- and mid-sized businesses (SMBs) manage operations economically. It eliminates the corporate boundaries, and helps manufacturers streamline their key operations – including sales, purchase, inventory, production, quality control, compliance, planning, etc. Moreover, it is secure, reliable, scalable, and accessible from any device and at any time.

- No upfront hardware and software cost
- Lesser operating expense on subscription
- No additional maintenance and support cost
- No (or reduced) IT staffing cost
- Complete Security
- Disaster recovery facility running 24x7
- Access from Desktop, Laptop or Mobile devices; Anytime, Anywhere
- Increase number of licenses whenever required
- Automatic and free upgrades
- 99.9% uptime assurance

6. Micro-verticalisation to Hit Industry-Specific Challenges

BatchMaster knows one size can't fit all. Thus, it offers ERP solutions already tailored for specific industries. Dividing the horizontal platform of the process manufacturing industries into micro-vertical segments, BatchMaster strives to effectively meet every single challenge of that particular industry. BatchMaster offers- BatchMaster ERP for Food & Beverages, Pharmaceuticals, Specialty chemicals, Paints & Coatings, and Personal Care & Cosmetics. Furthermore, using nano-vertical strategy, BatchMaster is now capable enough to penetrate deeper into the roots of your business to understand it well to provide the solution specific to sub-industries as well.

7. Meets Industry Standards and Regulatory Compliances:

Industry specific compliance processes are built into every facet of BatchMaster applications to ensure federal and industry specific regulatory mandates are met. Product developers can adjust specifications using USDA, Genesis and user defined product databases to ensure label claims are being met. BatchMaster's FDA module generates compliant FDA nutritional fact panels. Powered by Lisam EXESS, a 3rd party solution, BatchMaster's SDS module generates compliant SDS reports and labels.

Production staff can quickly track and trace suspect materials from receiving through shipping, shipping back to receiving, or anywhere within WIP in order to meet GFSI product traceability and recall mandates.

BatchMaster software maintains a history of key transactional history for auditor reports (e.g. Master Batch Records for FDA review).

- Alert product developers that a given formula's ingredients exceed industry established percentages or recommended daily intake levels
- Support the special processing and reporting of allergens and organic ingredients, as well as of Kosher and Halal products
- Support Food related labeling and reporting requirements, including GMP, FDA and GFSA requirements
- Support Chemical related labeling and reporting requirements, including GMP, SARA Type III, REACH, HAZMAT, SDS, MSDS and INCI requirements
- Run graphical bidirectional lot traceability inquiries and recall reports
- Maintain master batch records and other key transactional audit records

Who We Are:

BatchMaster Software is one of the market leaders in offering enterprise software solutions for the process manufacturing industries. With an in-depth industry analysis, we clearly understand the unique industry challenges and help them address those challenges through our industry-specific ERP solution.
