BatchMaster Software Pvt. Ltd.

BatchMaster Software Pvt. Ltd. is one of the market leaders in offering enterprise software solutions for the process manufacturing industries. Majorly capturing international market, it has many clients in India too. With an in-depth industry analysis, gained through a vast industry experience with over 2500 plus implementations worldwide, we clearly understand the unique industry challenges. BatchMaster offers ERP solutions that are apt to support industry specific operations and handles critical processes of the micro-verticals. Process manufacturing companies around the globe have come to rely upon BatchMaster® to manage nearly every aspect of their manufacturing and distribution operations. With headquarter in Laguna Hills, BatchMaster has its offices in New Jersey, India and New Zealand.

BatchMaster offers ERP solutions that support industry specific functionalities and handles critical processes of the micro-verticals. The solution empowers organizations streamline their operations, reduce wastage, bring down costs, increase profits, improve compliance and manage safety to keep their customers happy and satisfied.

Moreover, the company is now an **ISO 9001:2008** and **ISO 27001:2013** certified company. Also, the awards like: Customer's Choice, Great User Experience, Rising Star, and Madhya Pradesh's Best Brand prove that the company is an outstanding cookie in its sector. BatchMaster Software has a network of business partners that trust our capabilities and let us extend their products with our process manufacturing functionalities. The aura of BatchMaster has competent partners like- SAP Business One, Microsoft Dynamics GP, Sage 100\30, QuickBooks, etc.

BatchMaster Software employs over 200 professionals, about half of which are in Research and Development, who together contribute to the development and delivery of our industry specific ERP solutions. Our staff keeps tabs on the latest trends, challenges, regulations, and best practices in our targeted process industries, such as food, chemical, nutraceutical and pharmaceutical, as well as the latest technology advances, ensuring that these areas are addressed in our current and future products and services. Driven by our customers' needs, our professional services team helps them identify their business and manufacturing objectives and requirements, and configure their delivered solution to meet these requirements. Experienced customer support staff in conjunction with comprehensive education services ensures our customers maximize their investment in their BatchMaster application as a part of our lower cost of ownership initiative.

Basecamp Startups Pvt. Ltd.

An in-house incubator for enterprise-level technology, Basecamp Startups is an initiative by the promoters of BatchMaster Software. With a team of software professionals dedicated to the development of applications, the company aims to develop, manufacture, and innovate products that can be used for increasing business productivity and simplifying day-to-day tasks. Established in 2016, Basecamp Startups has succeeded in placing its products in several industries, irrespective of their type and size. In this dynamic technology marketplace, BSPL focuses on persistence, endurance and adaptability in its products to deliver long term value to its customers.

- Identifying and quantifying critical business issues & challenges.
- Mapping business-use cases and market reports to the identified issues.
- Identifying innovative technology solutions.
- Defining standard procedures for developing, iterating and launching products.
- Facilitating the development of those products from conception to creation.
- Creating market presence for products and services through specialized marketing service.

Basecamp Scout

Basecamp Scout is a fast emerging GPS and mobile tracking solutions provider, which offers solutions on Android, iOS, and web-based platforms to the end user. It serves a wide gamut of business and personal tracking needs where use of GPS and telematics has proved revolutionary. In a short span of time, Basecamp Scout has churned out successful software products with a team of expert and experienced professionals.

Basecamp Scout is an initiative by promoters of BatchMaster Software, who are the market leaders in offering enterprise software solutions for the process manufacturing industries, have rich experience of over 30 years and 2500 implementations worldwide, and serve over 2000 customers from seven different offices across the globe with integrity. The same virtues reflect in Basecamp Scout, which focuses on delivering long-term value to its customers through its quality software applications. The company continues to identify innovative technological products and develop those products right through the conception phase to creation.

BatchMaster Enterprise

One complete ERP solution- Truly end-to-end!

BatchMaster Enterprise, our flagship product, is a fully-functional and features rich ERP solution designed specifically with the aim of making businesses simpler. Available on-premise and on-cloud, it is a complete solution that can handle everything from the supply chain, retail operations, GST, e-Commerce, sample tracking, to warehouse management.

An all-in-one ERP in the true sense, it helps businesses streamline operations, improve efficiency, and boost productivity through proper handling of product development, formula management, planning, procurement, inventory, production, quality, compliance, sales, and finances. In addition, it includes out-of-the-box reports, numerous dashboards and inbuilt business intelligence that offers a holistic-yet-detailed picture of complete your business aiding accurate, better and informed decision making. Suite of modules that makes businesses simpler

Suite of modules that makes businesses simpler

● Formulation:

BatchMaster ERP's comprehensive formula management system helps meet critical demands of formulation such as formula security & formula control, desired formulation target cost accompanied by 'what if' scenarios, separate costing for formula and packaging, support to multiple units of measurement, full version control with time stamping etc.

● Robust R&D:

Dynamically adjusts formulas during product development to meet specified target physical or nutritional characteristics. R&D module comes with elaborate product development & quotation functionality, eases contract manufacturing, allows collaboration and information sharing between contracting and contract manufacturing company, defining multiple packaging sizes of the products with the same formulation & creating formulas based on product specifications, among others.

● MPS/MRP:

Master Production Scheduling (MPS) & Material Requirement Planning (MRP) use real-time information of demand/supply for batch production schedules, ensure there's no shortage of materials during production, minimize inventory & utility costs, auto generate production schedules & allow direct transfer of MPS/MRP orders to purchase and production order.

● Quality Control:

This module helps ensure the quality of products as per cGMP norms through features like sampling plan, stability testing, deviation reporting, inspection plan for capturing batch monitoring activities, complete audit trail of QC specifications by QC version, electronic execution of SOP's by inspection check list etc. Moreover, the QC module is equipped well enough to help businesses track quality levels at various stages.

● Production:

It allows the creation of mix, fill, assembly and rework type of batches, gives the choice for size by finished weight/volume or available materials, enables critical materials identification and issuing inventory based on lot reservation. Besides, the production dashboard gives real time visibility of batch status.

● Finance & Accounting:

Finance module streamlines core financial processes while ensuring in-depth visibility into the cash flow, end-to-end. It comes with price lists and 'what if' options for costing of products and formula, cost roll-up functionality, allows accurate costing of materials, labour and overheads, gives a real-time detailed analysis of cost structure and enables product cost history reporting.

● Packaging BOM:

Manage raw materials, costs, and instructions for sub-assembly and top-level packaging separate from formulas.

● Traceability & Compliance:

Stay compliant with industry- specific and federal regulations, in terms of labeling, lot traceability reports, transactional audit reports, and shipping documentation.

● Product Costing:

Roll up existing and theoretical product costs, as well as fixed, tiered, and scalable costs, of formulas, intermediates, and finished goods during product development.

● Inventory:

Manage inventory based upon quality status, units of measure, expiration date, lot number, strength, license, serial number, and location to ensure the right inventory is available for manufacturing and distribution activities.

● Sales:

The Sales module provides tremendous versatility, control, and power over sales and order entry policies. Aiming at superior customer service and simpler order–to-cash cycle, BatchMaster ERP facilitates quick order creation, instant picking, packing and shipment, contract definition, pricing and discounts, etc.

● Purchase:

From Procurement to quoting, from ordering to receipt and invoicing, BatchMaster's Purchase Module helps you through all. Be it your Contract Management, Vendor Management, rate sealing with Vendor, inspecting material received or returns, BatchMaster handles them with ease.

BatchMaster for Retail

BatchMaster Retail Management Software allows the retailers to manage both online as well as offline retail business and give the customers a consistent, omnichannel experience across all touchpoints. It takes care of retail business' every manufacturing needs – managing both contract as well as in-house manufacturing with equal ease; wholesale & distribution needs. It manages all aspects of your business from planning to procurement, inventory management to order entry and finally selling through different channels like wholesale, distribution, franchisees, retail, etc. Even your e-commerce needs are met through Magento integration to manage online/web-store business extending up to handling retail & POS including managing policies, promotions, discounts, coupons, customer loyalty and more.

Features

- Multichannel Order Management
- Support to Omnichannel Sales
- Purchase Order Management
- Warehouse Management
- Inventory Management
- Supplier/ Vendor Management
- Retail POS System
- Returns Tracking Management
- Production Planning & Control
- Demand Forecasting
- Formulation & BOM
- Costing
- Serialization Capabilities and Barcodes Generation
- Dashboards & Reporting
- Customer Relationship Management (CRM)
- Master Production Scheduling (MPS)
- Material Requirement Planning (MRP)
- Sales & Analytics
- Loyalty Management
- Discount Management
- Integration of e-commerce with ERP
- Employee Management

Business Benefits

- Seamless integration with in-store and online POS systems for instant access to stock levels
- Advanced reporting features give accurate inputs to the buying patterns of consumers
- All functionality work off a single database, ensuring a unified approach
- Access to fast & accurate real-time inventory data to all retail outlets in real time
- Support to each of the sales channels of a retailer
- Enhances the efficiency of core business functions
- Gives a customer-centric approach
- Improved employee productivity and overall company responsiveness
- A consistent system that functions equally well both at back office to the front of the store
- Complete control over inventory and cash
- Increase in sales, with a reduction in lost sales
- Increased loyalty through multi-channel loyalty programs
- Available on Cloud, which means you get real-time access to key business data
- Achieve multi-warehouse capability

BatchMaster Point-Of-Sales

For Retail

BatchMaster Point-Of-Sales (POS) is a full-featured, web-based point of sale software solution that addresses the needs of businesses in wholesale, distribution, restaurants and retail. Being a fully integrated system, it syncs the complete information of products, customers, and orders into a single platform. The system is flexible to support multiple payment modes.

Features:

- Inventory item codes are accepted both manually and automatically via a bar-code scanner
- Keep track of prices, offers & happy hours
- Manages multiple store sand keeps them connected with warehouse
- Accepts the payment through cards, cash, cheques, e-wallets or other bank transfers
- Keeps the invoices open until the work is completed
- Multiple printer support
- Allows to put that sales orders on hold
- Keeps tight control over cash receipt

Business Benefits

- Process transactions quickly
- Manage consistent pricing
- Display real-time information
- Control thefts & manipulations
- Accepts multiple payment modes

For Restaurant

BatchMaster POS is a complete restaurant 'order to billing' management system that displays entire menu options along with their images & price. It takes down the order with a simple touch and sends it directly to the kitchen. The system is flexible to support multiple payment modes.

Features:

- Simple UI/UX
- Available on cloud & premise
- Handles SCM
- Tracks daily expenses, cash receipts, material invoices, etc.
- Centralise entire data across of multiple outlets
- Touch-screen compatible
- Secures data both locally & on the cloud
- Adds list of items with proper categories, description, price, and toppings
- Generates unique token number for respective tables
- Supports multiple payment modes
- Keeps track of pricing & offers

Business Benefits

- Process transactions quickly
- Manage consistent pricing
- Display real-time status of food ordered
- Control thefts & manipulations
- Accepts multiple payment modes
- Eliminates long queues
- Help you serve better & serve right

BatchMaster Warehouse Management System

Boost warehouse efficiencies

BatchMaster's Warehouse Management system helps manufacturers to control and manage their day-to-day operations in a warehouse efficiently. Through the use of mobile or handheld devices, it allows to remotely execute and track details of different warehouse operations like: receiving, shipment, all internal movements, LPN/Pallet management and other shop floor transactions. Offering end-to-end support to the warehouse operations, the solution offers inventory accuracy, inventory visibility, space utilization, labor productivity, cost saving, and customer satisfaction.

Features

- Supports Inbound Transactions that include Goods Receipt PO and Sales Return
- Manages Outbound Transactions including Delivery, Purchase Return and Pick List
- Performs Internal Movements like Warehouse Transfers, Bin Transfer, LPN Maintenance, Attach LPN to SO, Split LPN, LPN Inquiry, etc.
- Does Adjustments & Counting of, Goods Issue, Goods Receipt, Physical Count, Spot Count
- Handle Production activities like, Raw Material Issue, FG Receipt, Labor Time Entry, Inspection Transactions and Transaction Checklist
- Generates Labels & Reports for Items, Bins, LPN Label, LPN Packing Slip, LPN Inquiry and Stock Inquiry

Business Benefits

- Improve inventory precision
- Increase warehouse productivity
- Process orders faster
- Improve picking & shipping accuracy
- Achieve more order accuracy
- Improve employee productivity and keep personnel costs low
- Quick ROI

BatchMaster Enterprise on Cloud

Manage your business- Anywhere, Anytime

BatchMaster Enterprise on Cloud is a SAAS based version of BatchMaster Enterprise that adapts to the needs of small- and mid-sized businesses (SMBs) economically. Eliminating the corporate boundaries, it helps manufacturers streamline their key operations – including sales, purchase, inventory, production, formulation & R&D, quality control, compliance, planning, and more.

Features

- Disaster recovery facility running 24x7
- Flexibility & Ease of Access to Service
- Access from Desktop, Laptop or Mobile devices; Anytime, Anywhere
- Needs only a web browser and a network connection
- Scalable- Increase the number of licenses whenever required
- Automatic upgrades
- Regular data backup and 99.9% uptime with a supreme Disaster Recovery plan

Business Benefits

- Cost Saving
- Extremely secured environment
- Scalable at any time
- Peace of Mind Ensured
- Faster Time to Value

BatchMaster Manufacturing for SAP Business One

Accelerate Your Company's Growth

Built on the strong foundation of SAP Business One platform, BatchMaster ERP with SAP Business One is a comprehensive ERP solution that meets the unique needs of emerging and growing process manufacturers, specifically in the Food & Beverage, Nutraceutical, Chemicals, Paints, Personal Care, and Life Sciences industries. Our solution effectively manages all the manufacturing complexities inherent to the products, processes, and variables in these industries. And since it is inbuilt, not integrated, you have one user login, one interface, and one database.

Highlighting features:

- Virtually consolidates batch information and manages multi-staged production, controlling costs and overheads.
- Achieve the highest productivity with the existing setup with "Current Good Manufacturing Practices".
- Facilitates defining intended quality tests at every stage of material movement & product development.
- Assures that the required quality tests have been executed and the results meet the specifications.
- Tracks material flow to bring visibility and transparency of business processes.
- Assures conformance, implement CAPA, revamp packaging and labels.
- Makes 'what-if' cost analysis and calculates profitable.
- Assures process cells are fully utilized, procurements are done on time, stocking is just adequate, and expiry and shelf-life are tracked.
- Cut wastage and expired inventory with the efficient planning tool.
- Forecast sales orders and converts orders directly to production orders.
- Incorporates robust and secure R&D to meet the market trend.
- Dynamically adjusts, nutritionally analyses and securely manages recipes.
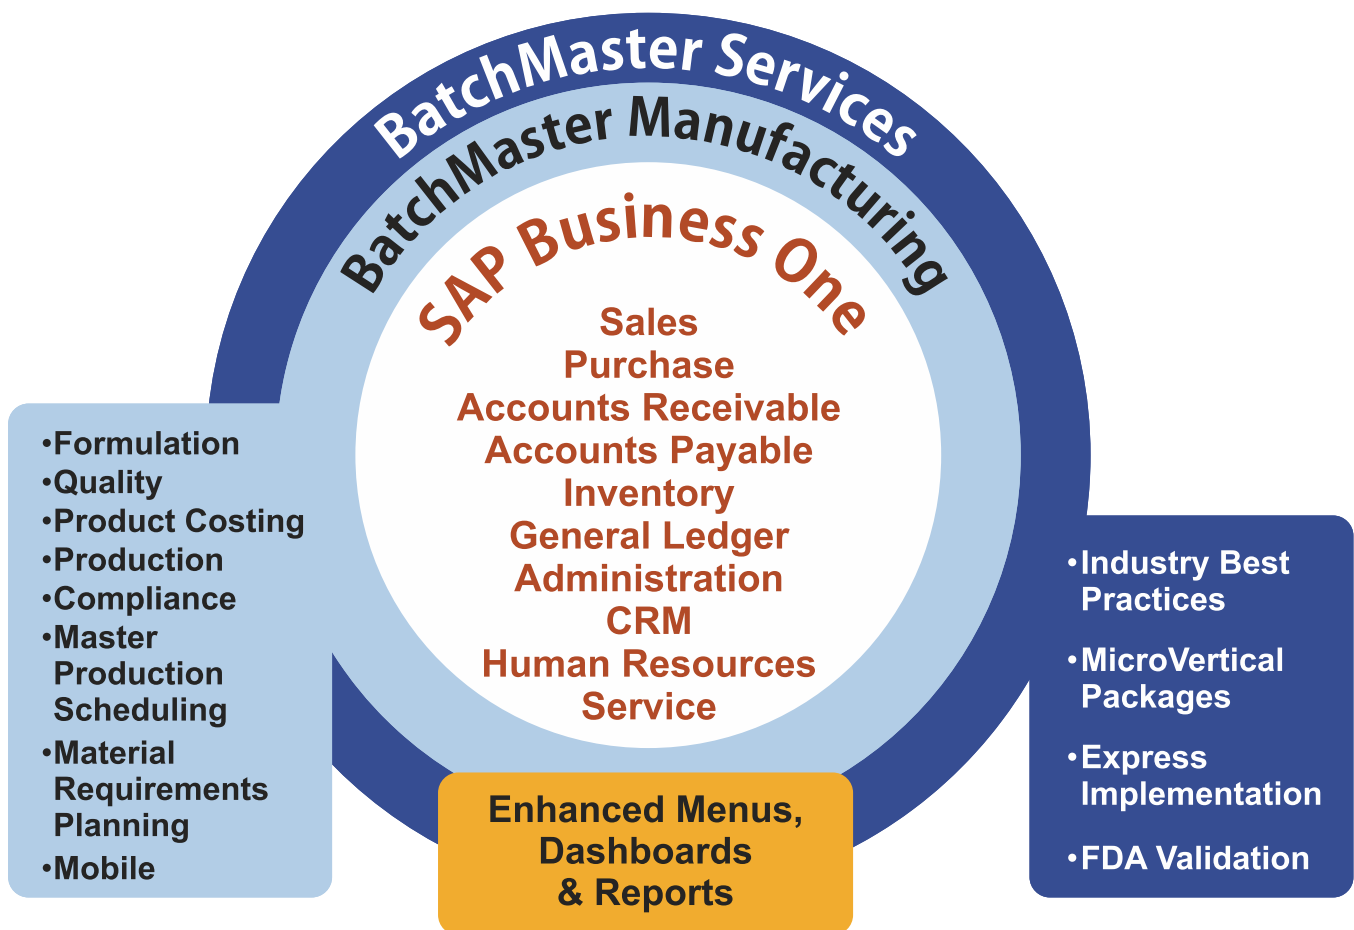

Benefits:

- Built on the strong foundation of SAP Business One
- Targets For Top Quality
- Adheres to Regulatory Compliance
- Controls Costs & Losses
- Accelerates Production
- Reduces Inventory Wastage
- Brings Continuous Innovation

BatchMaster
Warehouse Management
Powered by SAP Business One

BatchMaster Warehouse Management System (WMS) powered by SAP Business One is a stand-alone application based on SAP Fiori design with full responsive user interface designed for mobile devices like industrial handhelds and tablets that help to remotely perform various warehouse operations like receiving, shipment, all internal movements, LPN/Pallet management and shop floor transactions. The transactions performed gets posted to SAP Business One in real time manner giving you complete visibility and utmost accuracy.

Highlighting features:

- Perfectly handles goods receipt and sales returns
- Ensures timely delivery with accurately generated pick list. Moreover, handles purchase returns as well
- Keenly and instantly tracks every inventory transaction, namely: warehouse transfers, bin transfer. In addition, it also supports LPN Maintenance, Attach LPN to SO, Split LPN, and LPN Inquiry
- Accurately updates inventory in real-time for different transactions, like: goods issue, goods receipt, physical count, and spot count
- Offers complete support to different production processes like: raw material issue, FG receipt, labor time, entry, inspection transactions, and transaction checklist
- Generates and prints every essential label and report. Like: item label, bin label, LPN label, LPN packing slip, LPN inquiry, and stock inquiry

Benefits:

- Improves inventory precision
- Increases warehouse productivity
- Process orders faster
- Improves picking & shipping accuracy
- Achieves more order accuracy
- Increases volume of outbound shipments; double your orders per day
- Improves employee productivity and keep personnel costs low
- Low TCO compared to alternatives
- Quick ROI

BatchMaster Manufacturing for SAP Business One on Cloud

Manage your business- Anywhere, Anytime

BatchMaster Manufacturing for SAP Business One on Cloud is a SAAS based version of BatchMaster Manufacturing with SAP Business One that adapts to the needs of small- and mid-sized businesses (SMBs) economically. BatchMaster ERP

Process manufacturers run a number of leading financial applications, which is why BatchMaster Software offers BatchMaster ERP a leading process manufacturing suite that has a proven integration with Tally, QuickBooks, Sage 100 & 300, Microsoft Dynamics GP and SAP Business One. So you don't have to fear losing your long used financial system to upgrade to an ERP software. It is an end-to-end ERP software designed to meet the unique requirements of regulated manufacturing industries that too while integrating easily with their existing financial application. It works well for both, make-to-stock and make-to-order environments.

BatchMaster ERP software understands your unique manufacturing requirements during product development, procurement, production, quality, packaging, costing, and compliance, while, at the same time supports your sales, accounting, warehousing and distribution needs. Subsequently, it helps you streamline your operations along with fully integrating data across your entire organization.

Because of BatchMaster ERP's power packed functionalities, the process manufacturers are able to bring their products to market, faster and cheaper while complying with stringent regulatory mandates. The excellent quality and traceability capabilities not only help you retain your valuable customers but also let you gain the new ones.

BatchMaster ERP with Sage 100 ERP & Sage 300 ERP

BatchMaster ERP can seamlessly integrate with your Sage 100 or Sage 300 to give you a complete ERP that can streamline all your business-critical processes without having to give up/transform your crucial data. Wondering but why you would do this? Because automating only your accounting or financials is just not enough to shine and rise in today's highly competitive and regulated scenario.

It allows process manufacturers do various tasks to take care of - maintain and record different processes, continuously and simultaneously, occurring in their company. At the same time, they need to maintain their accounting information and making these two talk can be a time and resource draining task.

However, BatchMaster ERP integrated with Sage 100/ Sage 300, makes it easy and quick. With its wide range of modules, BatchMaster ERP with Sage 100/Sage 300 handles your formulas, batch processing, quality control, material planning, inventory, sales and purchase needs. While the integration precisely synchronizes the financial data of these processes. Helping your formula-based business run more efficiently and profitably.

Highlighting features:

- General Ledger, Accounts Receivable, Accounts Payable and Cash Book modules remain under the control of QuickBooks, however Inventory, Sales Orders, and Purchasing is under BatchMaster ERP's control
- Intensive R&D and formulation capabilities
- "What-If" cost analysis for maintaining profits
- Comprehensive Bill-Of-Material functionality
- MSDS, Certificate of Analysis and Lot Recall letter/report easily generated
- Efficient material and production planning
- Adept inventory management
- Smartly handles order-to-procurement and quotes-to-cash cycle
- Tight control of all accounting modules and information
- True integration across the application and with Sage 100/Sage 300
- Full multi-lingual and multi-currency support
- Efficiently tackles demanding budgets
- Maximized accuracy of financial data
- Up-to-date sales information along with outstanding balances
- Full-integration with Banking Services for complete Bank Reconciliation
- Streamline Cash Flow system
- Varied accounting and reporting features resulting in Fast Invoice Entry, Flexible Cash Disbursement and Full-Cheque Reconciliation

BatchMaster ERP with QuickBooks

When you integrate QuickBooks and BatchMaster ERP, you transform your business into a more process manufacturing-centric and efficient company.

BatchMaster ERP is considered as an experienced and expert solution to handle all process manufacturing supply chain operations like: formulas/recipes, R&D, batch processing, purchase, sales and inventory. Also, without overlooking finances, it helps in deriving a competent price, efficiently planning production and purchases, timely meeting deliveries and much more that too in full adherence with regulatory compliances. Successively, when QuickBooks is integrated with BatchMaster ERP, the seamless integration between the AP, AR and GLs of BatchMaster ERP and QuickBooks ensures that every transaction is registered and every entry is punched. Automatic, instant yet accurate uploads and downloads of data (vendors, customers, invoices, vouchers, transactions, GLs, et al) give way for eliminating redundant data entry.

Synchronizing data of every transaction of sales, purchase, production, warehouse transfers, etc. with finance, the combination (i.e. BatchMaster ERP with QuickBooks) excels in completely streamlining operations, handling finance, and satisfying statutory requirements in line with the current government regulations.

Highlighting features:

- Tailor-made for process manufacturers like Food, Cosmeceuticals, Paints & Coatings, Life Sciences, Pharmaceuticals and such
- Seamless integration with QuickBooks ensures the smooth and automatic flow of information
- Eliminates redundant entries
- Uplifts productivity with real-time and accurate reporting
- End-to-end, precise yet faster financial accounting
- Comprehensive innovation and development capabilities
- Efficient as well as effective planning
- Tighter control on inventory along with reduced wastage
- In compliance with government regulations
- Throughout multi-lingual and multi-currency support
- Numerous accounting and reporting features resulting in smoother cash-flow as besides quicker invoice/voucher generation
- Intensive recipe/formula management
- Keen bi-directional tracking
- Supports excellent vendor evaluation, maintains intensive vendor details as well as executes purchase receipts reflecting real-time inventory change
- Smoother and faster Order to Cash Cycle with full support for instant order creation, picking, packing, shipping and finally invoicing
- "What-if" Cost Analysis and thorough cost comparison

Benefits

- Reduce cost by streamlining operations
- Granular level accurate product costing
- Availability of the right material at the right time
- Supports contract manufacturing and loan licensing
- Improved product quality
- Faster time to market
- Reduced non-conformance risk
- Respond quickly to customer needs
- Integrates with your existing finance software

BatchMaster ERP with Tally

BatchMaster-Tally integration is designed to give you the best of both the worlds. BatchMaster- a true process-centric software and Tally- unbeatable in its finance handling capabilities, when packaged together promise a complete solution handling your distribution, manufacturing and finances too!

A combination nonpareil it provides manufacturer's ability to handle their formulas/recipes, R&D, batch processing, purchase, sales and inventory. In course, without overlooking finances, it also derives a competent price, plans purchases and production and fully adheres to regulatory compliance. The seamless integration between the AP, AR and GLs of BatchMaster and Tally ensures that every transaction is registered and every entry is punched. Automatic, instant yet accurate upload and download of data (vendors, customers, invoices, vouchers, transactions, GLs, et al) give way for eliminating redundant data entry.

Features

- Tailor-made for process manufacturers like Food, Cosmeceuticals, Paints & Coatings, Life Sciences, Pharmaceuticals and such.
- Seamless integration with Tally ensures smooth and automatic flow of information.
- Paves-away redundant entries.
- Uplifts productivity with real-time and accurate reporting.
- End-to-end, precise yet faster financial accounting.
- Comprehensive innovation and development capabilities.

- Efficient as well as effective planning.
- Tighter control on inventory along with reduced waste.
- In compliance with government regulations.
- Throughout multi-lingual and multi-currency support.
- Numerous accounting and reporting features resulting smoother cash-flow as besides quicker invoice/voucher generation.
- Intensive recipe/formula management.
- Keen bi-directional tracking.
- Supports excellent vendor evaluation, maintains intensive vendor details as well as execute purchase receipts reflecting real-time inventory change.
- Smoother and faster Order to Cash Cycle with full support for instant order creation, picking, packing, shipping and finally invoicing.
- "What-if" Cost Analysis and thorough cost comparison

Benefits

- Faster order-to-cash cycle
- Enhanced productivity through vendor management
- Smoother cash flow
- Accurate cost analysis
- Faster time to value
- Immense domain expertise
- Lucid handling of financial operations

BatchMaster ERP on Cloud

Manage your business- Anywhere, Anytime

BatchMaster Manufacturing for Microsoft Dynamics GP

Grow Your Business Through Manufacturing Excellence

BatchMaster Manufacturing for Microsoft Dynamics GP is a complete business management software designed specifically for process manufacturers who deal with formulas or recipes. In-built Microsoft Dynamics GP and not integrated, this robust solution gives your employees the ability to work in a single environment through the same interface. Log-in with the same credentials, and stay connected and informed by working on the same database.

The product securely exchanges data between BatchMaster Manufacturing modules and Inventory, Sales, Purchase of Microsoft Dynamics GP, giving you the ability to continue using Microsoft Dynamics GP coupled with the power of Formulation, Batch Processing, Product Development, Material Planning and more.

From research to delivery, from back-office to CEO-BatchMaster Manufacturing for Microsoft Dynamics GP caters to the needs of every department and of all levels. Thereby, promising easy creation and consolidation of financial statements, better and more reliable decisions, improved cash flow, accelerated information analysis, reduced wastage and increased ROI!

Features

- Meet target characteristics through dynamic formula adjustment
- Analyse material and formula costing separately.
- Manage inventory based upon quality status, units of measure, expiration date, lot number, strength, license, serial number, and location
- Generate labels, lot traceability reports, transactional audit reports, and shipping documentation to meet compliance
- Robust MPS/MRP modules to support make-to-stock & make-to-order environments
- Create and schedule the optimal number of batch jobs required for a product formula and its multiple packaging configurations
- Roll up existing and theoretical product costs, as well as fixed, tiered, and scalable costs, to formulas, intermediates, and finished goods during product development.
- Employ handheld RF devices to execute inventory movements and adjustments within one or more facilities
- Establish a comprehensive QC program from vendor inspection plans to formula and finished good QC testing
- Meet the delivery schedule, purchase activities and plan orders

Benefits

- Invent and refine your products
- Analyse affordable yet profitable cost
- Gain greater control over inventory
- Assure quality and compliant products
- Perfectly balance demand and supply

Add-ons

BatchMaster ERP solution is a complete set of all the basic functionalities, essential for a process manufacturer, still it offers certain Add-Ons which are needed to make the solution a perfect tailor fit for different industries.BatchMaster Point-Of-Sales

BatchMaster Sample Request Manager

Track, understand, & meet customers' requirement Sample Request Manager tracks new products from customer request to acceptance. Right from tracking customers' specifications, managing secured formulation, creating batches, analyzing cost, to maintaining conversational follow-ups- BatchMaster SRM supports all. It accurately estimates the cost associated with that request and maintains complete sample information like anticipated sales volume, current price, target price, the base formula used and estimated time required to produce that sample. Additionally, it yields sample specifications based on basic nature, physical properties, and chemical properties of raw material used. In short, sampling enables you to perform rigorous R&D on the samples, and make the finished good in accordance with the customer requirement.

Features

- Checks the present status of sample request
- Tracks and maintains details of customers/prospects
- Maintains sample information like anticipated sales volume, current price, target price, etc.
- Records sample specifications
- Tracks material, packaging, and R&D cost
- Views and records related documents
- Tracks customers' entire communication
- Demands authorized approvals
- Relates samples with BOM and production batches
- Through R&D a new formula can be created, and subsequently a mini batch can also be created
- Perform cost analysis

Benefits

- Meet customers' specifications precisely
- Make accurate costing
- Perform rigorous and safe R&D
- Systematic maintenance of sample information

Magento Integration

Expand your business online too

BatchMaster offers a connector that links your Magento store with BatchMaster ERP. The integration captures every event changes in Magento and propagates the changed data to BatchMaster ERP. By synchronizing BatchMaster ERP and Magento, it allows manufacturer's e-commerce website to effectively perform management of customers, products, inventories, sales, and shipping data.

Features:

- Automatically populates Magento with your customers, products, inventory levels and prices.
- Real-time creation of sales order in BatchMaster Enterprise
- Bi-directional exchange of data between BatchMaster Enterprise and Magento
- Promotional pricing and catalogue uploads to Magento, the moment you feed it to BatchMaster Enterprise.
- Shipment tracking

Benefits:

- Boost productivity- with streamlined multiple business processes
- Better control over business- with real time information update, reports and financial statements
- Eliminate data redundancy and human error- with automatic exchange of correct information from one platform to another
- Reduced inventory and operational costs- with order consolidation, planned purchase and reduced wastage
- Improved customer experience- through on time delivery
- Single point of operation – for simplicity and time saving
- Suitable for small, medium and large size companies
- Useful in case of expansion – convenient synchronization amongst all platforms
- Building the bridge- facilitates the information and data flow

GST

BatchMaster GST module handles all your taxation needs that too in full compliance with GST rules. Fully capable of handling the complexities of Domestic Sales, Exports, Deemed Exports, Exports through warehouses, Warehouse Transfers, Inter-state & Intra-state sale, Advance Payments etc., it keeps a complete track of CGST/SGST/ISGST/CESS(S). As the Indian Govt. has already revealed that the returns and registrations under the GST regime will be carried online and so a good, user-friendly software will be much-needed by the manufacturers. Assuring optimum utilization of manpower and time with adaptability to latest notifications, it will keep you ready for GST Audits at any given time.

Key Documents Generated by BatchMaster GST:

- Generates all GST documents as per the laid down procedures in the statute.
