BatchMaster ERP for Biotechnology

Panacea for all business ills

Rapid technological advancements and availability of low-cost biosimilar drugs is keeping the biotechnology segment in the life sciences industry in a good stead. So is the increased income levels and rising urbanization in emerging markets, which has boosted demand for these innovative products. However, it has given rise to the competition, thus forcing the manufacturers to find ways to deliver these drugs cheaper, safer and faster. Other challenges like stringent regulatory compliances and long product development cycles also hinder the industry's growth.

BatchMaster ERP for Biotechnology is one solution which ticks all the requirement boxes of biotechnology pharma manufacturers in their quest to deal with the challenges. Its robust features ensure adherence to regulatory compliance requirements including cGMP. Besides, it also maps manufacturers' varied business processes like formulation, batch management, supplier verification, and generation of BMR etc., and provides real-time information of all the departments which helps manufacturers to streamline their entire operations and take proactive informed decisions.

- Consistent record of never exceeding implementation time of 350 to 500 hours*

* Actual project plan may vary depending on number of users and project scope assessment.

Products:

BatchMaster ERP
Our Flagship product, BatchMaster ERP, is a true process-centric solution serving the manufacturing, distribution, finance, compliance and quality needs of your business.

BatchMaster Point-Of-Sales (POS)
A web-based software solution for wholesale, distribution, and retail businesses, it can be used online on iPads, Android tablets or laptops. By syncing the complete information of products, customers, and orders into a single platform, it makes it easy to scan products, check for inventory, apply discounts or offers, and accept payments both in plastic money as well as in cash. Ultimately, helping retailers improve customer service, increase productivity, reduce thefts and offer better retail experience.

Integration with MAGENTO:
Integration of BatchMaster Enterprise with Magento helps manage your business online. The integration provides a seamless method to completely collaborate your ERP system with your current or upcoming Magento stores. Via this integration, orders from your Magento store and website will automatically be loaded into the BatchMaster Enterprise ERP solution – along with an alert about order arrival. It enables complete synchronization of item records, price lists, inventory, taxes, business partners, orders, deliveries, shipping & tracking, and payments.
