

BatchMaster ERP for Injectables

Injects profitability to your business

Increase in beauty consciousness coupled with a rise in disposable income and urbanization has given rise to practices such as beauty enhancement by facial injections, non-surgical cosmetic surgeries, etc. This has also spiked the demand for products like Botox and Hyaluronic Injections, which has boosted the injectables industry. The manufacturers of injectables, however, have been grappled with a few issues. The competition is increasing day by day, regulatory requirements are getting stringent and there are issues with supply chain management. Moreover, producing quality products at an affordable price is a challenge, so is bi-directional traceability.

In such times, BatchMaster ERP for Injectables emerges as a perfect remedy for all such glitches faced by the injectable manufacturing companies. Its out-of-the box functionalities streamline the operations, support manufacturing processes, maximize productivity, provide formula security, accuracy in costing, appropriate packaging and labelling, adherence to regulatory compliance, keep wastage at bay, allows tedious laboratory calculations based on physical properties, et al.

Check out below the full list of the powerful features of BatchMaster ERP for Injectables:

- Formula design based on physical properties analysis like potency and strength
- Formula security to support Intellectual Property Rights (IPRs)
- Supports FDA and other compliance requirements
- HAZMAT bills of lading, VOC, and SARA reporting
- BOM and suitable packaging options
- Bi-directional lot traceability
- Shelf-life / expiration date
- Vendor approval and management
- Stability testing
- Non-Conformance and CAPA
- Complete traceability and costing of products
- Customized COA (Certificate of Analysis) reports
- Separate costing of formula and packaging materials
- New product development, R&D, and Its costing
- Warehouse management and real-time tracking of inventory movement
- Material substitution in formula and revision tracking
- Supports multiple Units of Measure (UoM)
- Make-to-stock and make-to-order operations
- Contract manufacturing and loan licensing
- Material Production Scheduling (MPS) & Material Requirement Panning (MRP) for optimum raw material procurement and order processing.

* Actual project plan may vary depending on number of users and project scope assessment.

Products:

BatchMaster ERP

Our Flagship product, BatchMaster ERP, is a true process-centric solution serving the manufacturing, distribution, finance, compliance and quality needs of your business.

BatchMaster Point-Of-Sales (POS)

A web-based software solution for wholesale, distribution, and retail businesses, it can be used online on iPads, Android tablets or laptops. By syncing the complete information of products, customers, and orders into a single platform, it makes it easy to scan products, check for inventory, apply discounts or offers, and accept payments both in plastic money as well as in cash. Ultimately, helping retailers improve customer service, increase productivity, reduce thefts and offer better retail experience.

Integration with MAGENTO:

Integration of BatchMaster Enterprise with Magento helps manage your business online. The integration provides a seamless method to completely collaborate your ERP system with your current or upcoming Magento stores. Via this integration, orders from your Magento store and website will automatically be loaded into the BatchMaster Enterprise ERP solution – along with an alert about order arrival. It enables complete synchronization of item records, price lists, inventory, taxes, business partners, orders, deliveries, shipping & tracking, and payments.
