

## BatchMaster ERP for Medical Devices

### A potent device for growth of your business

The biggest segment in healthcare, medical devices industry has observed tremendous growth in recent times due to technology-led innovation, which has forced the hospitals and clinics world over to upgrade their Information Technology (IT) infrastructure, and rise of tech-savvy and demanding patients, who wish to self-monitor themselves through medical devices at their home. But the lack of uniformity in infrastructure and awareness has posed various challenges such as low penetration, accessibility, affordability, meeting safety needs, high capital cost requirement for manufacturing etc., which hinder the growth of this industry.

In such scenario, medical-device manufacturers are turning to software solutions to make their products at a minimum cost without compromising the quality. BatchMaster ERP for Medical Devices, designed and developed to aide class I, class II, and class III medical-device manufacturers, has emerged as a preferred solution for them. A robust software, it streamlines their entire operations, including regulatory expectations, and provides control over supply chain, manufacturing, inventory, and costing. In addition, it provides support for numerous out-of-box reports and real-time information of work-in-progress by informative dashboards for proactive decision making and profit enhancing.

# BatchMaster ERP for Medical Devices

Check out the complete list of features of BatchMaster ERP for Medical Devices below:

## Products:

### BatchMaster ERP

Our Flagship product, BatchMaster ERP, is a true process-centric solution serving the manufacturing, distribution, finance, compliance and quality needs of your business.

### BatchMaster Point-Of-Sales (POS)

A web-based software solution for wholesale, distribution, and retail businesses, it can be used online on iPads, Android tablets or laptops. By syncing the complete information of products, customers, and orders into a single platform, it makes it easy to scan products, check for inventory, apply discounts or offers, and accept payments both in plastic money as well as in cash. Ultimately, helping retailers improve customer service, increase productivity, reduce thefts and offer better retail experience.

### Integration with MAGENTO:

Integration of BatchMaster Enterprise with Magento helps manage your business online. The integration provides a seamless method to completely collaborate your ERP system with your current or upcoming Magento stores. Via this integration, orders from your Magento store and website will automatically be loaded into the BatchMaster Enterprise ERP solution – along with an alert about order arrival. It enables complete synchronization of item records, price lists, inventory, taxes, business partners, orders, deliveries, shipping & tracking, and payments.
